## CONDITION OF THE MARKETS

TREO. P. HAUGHET. Pres't. H. LATHAM. Cash.

Chicago Speculators Experience a Very Violent Attack of "Bull" Fever.

A Day of Considerable Excitement and Frequent Fluctuations in Wheat and Corn-Provisions Only Moderately Active.

MONEY, BONDS AND STOCKS.

A Dull Market in New York, with a Generally Firm Feeling. NEW YORK, May 12 .- Money on call was easy

at 1 per cent. Prime mercantile paper, 434 @614 per cent. Sterling exchange was fair to active and firm at \$4.8614 for sixty-day bills, and \$4.8819 for de-

The total sales of stocks to-day were 67,515 shares, mending the following: Delaware, Lackswanna & Western, 4,400; Erie, 3,020; Lake Shore, 5,050; Missouri Pacific, 1,360; Northwestern, 1,900; Northern Pacific preferred, 1,520; Reading,

13,700; Richmond & West Point, 5,950; St. Paul, 6.340, Texas Pacific, new, 1,520; Union Pacific, 5.475.

The stock market to-day was very dull, and while there was no movement in the list, except in a few stocks, which was of any importance, prices sagged slightly. The opening still showed the influence of the upward spurt yesterday, and under a general bullish feeling was firm at advances over last evening's figures of from le to le per cent. London had purchasing orders in the trunk lines, grangers and coalers, but the "bears" were inclined to resist the advance and the demand soon slacked off, which gave a sagging tendency to the list after the first half hour. Richmond & West Point, however, with East Tennessee second preferred, were strong, the latter decidedly so, and it moved up 1 le per cent. Cotton Oil certificates also became a feature, and after a fractional loss moved up one per cent., but finally ended where it began. Manhattan advanced 2 per cent. on the story in a morning paper of an advance in fares in a short time, but reacted toward the close. The bank statement proved more favorable than had been anticipated, and some covering of "shorts" followed toward the end of the session, and the market closed about steady at irregular changes of small fractions for the day. The final changes are insignificant except in Manhattan, which is up 1 per cent.

The railroad bond market was moderately active, the only marked movements being in Kansas & Texas fives and sixes, and the Wheeling & Lake Erie firsts,

fives and sixes, and the Wheeling & Lake Erie firsts, which were strong and active. The total sales reached \$691,000. Milwaukee, Lake Shore & Western, Michigan division, rose 312, to 11012.

Government bonds were quiet and steady to firm.

State bonds were dull and steady. Closing quota-

The banks now hold \$22,276,675 in excess of the

Steady.

Tallow easier at 43sc. Rosin dull.

Eggs quiet and generally steady; Western, 134sc.

144c. Receipts, 4,318 packages. Pork quiet, but steady and unchanged. Cut meats firm and quiet. Lard advanced 5@7 points, closing firm; Western steam, spot, 8.70c, closing at 8.65@8.70c; June, 8.52c; July, 8.55@8.56c; August, 8.59c; September, 8.59@8.62c; October, 8.54@8.60c; city steam, 8.10c.

Butter quiet and easy; Western, 18@26c. Cheese unchanged and dull.

unchanged and dull.

CHICAGO, May 12.—The interest in wheat this morning exceeded that of any previous day. Sensational reports were exchanged between the great trading centers, and the "bull" fever raged. Prices here opened I cent over last night, and after dropping back a few points bounded up nearly I cent on buying both by the country and local crowd. The business was enormous and individual influence could not be noticed. The advance, after the first soft spot, was about I cent, and June sold up to 877ge, July to 89g, and December to 91 ge. This was the top for the day. A decline followed, and the "bears" made a big effort to break the market for June, which went back to 87g, July, 884g, and December to 90 ge. Strength returned before the close, and the closing prices were: May, 81c; June, 87 gc; July, 885ge; December, 91c. The opening prices were: May, 865ge; June, 874ge; July, 881go, and December, 90 gc. The corn market puzzled even the professionals to-day. Prices opened 5gc to 3gc over last night, and at once went higher, with wheat. After May sold at 60 gc, June at 58 gc and July at 585ge, there was very suddenly a great quantity for sale, and in less than fifteen minutes prices went off about 1c. As in wheat, there was a reaction and a return of strength before the close. May closed at 59 gc, June at 57 gc and July at 57 gc, or about 1c higher for the day. Oats, kept within a narrower range, but held an active crowd of operators. May touched 85 gc, and closed at 35 gc, June sold between 34c and 34 gc, closing at 34 gc. Provisions were moderately factive, stronger and higher. The strength, however, came chiefly from the buoyancy in wheat and corn. A fair number of outside orders to buy were received. Local "shorts" covered fair lines, and holders took advantage of the bulge produced by their buying, and unloaded fair lines. After buyers had been filled up, the marked weakened, and prices declined 05c on short ribs over yesterday's sales. July pork sold at \$14.40 a14.47 g, and closed at \$14.45; lard at lard at 8.35@8.421gc, closing at 8.40c; short ribs at 7.721g@7.80c, closing at 7.75c. The leading futures ranged as follows:

Opening. Highest. Lowest. Closing. Wheat-May .... une ..... -May ..... June ..... July..... Hogs—Receipts, 12,000; shipments, 5,000. Market opened 5c higher, but closed with advanced lost; mixed, \$5.35.25.60; heavy, \$5.55.25.80; light, \$5.30.25.60; pigs, \$4.25.15.

Sheep and Lambs—Receipts, 5.500; shipments, —. Market strong for good; common weak; natives, weeled, \$4.50.26.50; shorn, \$3.75.25.90; wooled Texans, \$4.50@6.

EAST LIBERTY, Pa., May 12.—Cattle—Receipts, 19; shipments, 18. Nothing doing; all through consignments. No cattle shipped to New York to-day.

Hogs—Receipts, 2,700; shipments, 2,600. Market steady. Philadelphias, \$5.95@6.05; mixed, \$5.85@5.90; Yorkers, \$5.65@5.75; common to fair, \$5.50@5.60; pigs, \$5@5.25. Three cars of hogs shipped to New York to-day.

Sheep—Receipts, 3.400; shipments, 3,400. Market fair on good; very dull and lower on common and medium.

ST. LOUIS, May 11.—Cattle—Receipts, none; shipments, 600. Market firm and same as on Friday. Hogs—Receipts, 600; shipments, 2,700. Market steady; choice heavy and butchers' selections, \$5.50 @5.65; packing, medium to prime, \$5.30@5.55; light grades, ordinary to best, \$5.20@5.45.

Sheep—Receipts, 2,100; shipments, 3,600. Market steady; fair to fancy, \$4@6.25.

CINCINNATI, May 12.— Cattle-Receipts, 62; shipments, 397. Market quiet and firm.

Sheep-Receipts, 2,04°; shipments, 480. In fair demand. Lambs in better supply and easy at \$5 Hogs-Market steady; common and light, \$4.25@ 5.65; packing and butchers', \$5.50@5.85; receipts, 1,200; shipments, 270.

INDIANAPOLIS MARKETS.

The Volume of Trade for the Week Closing To-Day Disappointing. INDIANAPOLIS, May 12. The volume of trade in the week just closed did not reach expectations. In most departments there is an

undertone which gives the markets a dragging tendency. But few merchants take hold with the confidence which is desirable to create an activity which will make up for the lateness of the season, and it begins to look as if the lost ground of April was not to be recovered this month, as had been hoped. It is comforting to note that Indianapolis is not an exception. The New York Shipping List, in speaking of the situation generally in its last issue, says: "Conservatism is still the predominant characteristic of business operations in nearly every department of activity, and while the outlook presents many promising features, trade moves along without displaying any animation or developing progressive improvement. Buying appears to be conducted on the handto-mouth principle, and the general tendancy towards lower prices for nearly all staple commodities not only encourages this, but indicates the feeling of uncertainty that prevails and that has not been neutralzed by the phenomenal cheapness of money, the abundance of loanable funds or the removal of anxiety respecting the future of monetary affairs. clearing house statistics points to a satisfactory volume of business compared with last year, railroad traffic and railroad

compared with last year, railroad traffic and railroad earnings are of the same encouraging character when compared with last year, but advices from nearly all the principal interior distributing centers report the same quiet conditions and reflect an absence of stimulating influences." In prices this week fluctuations in values have been few and of those which did occur more have been in the way of an advance than a decline. This remark will apply to dry goods, which, with the exception of sheetings, rule firm. Groceries show but little change; the advance of ½ cent made on coffees the early part of the week is fully maintained. Sugars are much firmer in tone than ten days ago. Other staple groceries moving out fairly well at unchanged prices. The produce markets were active to-day, but take the week through have been rather sluggish. Butter and poul try coming in freely; prices downward in tendency. Eggs firmer, on light receipts, and an improved demand. Irish potatoes plenty and weak at 95 cents per bushel, good stock. Strawberries, as usual on Saturday, were firmer, and really choice fruit brought \$4 per crate. Early vegetables are in better supply and prices weakening. By next week garden stuff of nearer home production will begin to come on to the market, but it will hardly sell lower than that now shipped in. Hardware men are having a brisk trade and prices on all lines rule firm. The iron and tinner supplies markets drag a little, but this is not unusual at this season of the year. Seedmen are still having considerable trade, and prices are firm at the revised quotations of the middle of the week. The flour market is more active, but prices do not improve with the advance in the price of wheat. The impression prevails with millers that wheat has reached about as high a figure as need be expected in the near future, at least, it being higher, relatively, than flour.

There was a good attendance on 'Change for Saturday and the bidding was spirited, there being a good

demand for all creals. Track bids ruled as follo	1

FIELD SEEDS Wholesale and Retail at HUNTINGTON & HOSS'S SEED STOKE, 78 and 80 E. Market st., Indianapo-lia. Samples and prices furnished on application.

A Remedy for Gapes. . Country Gentleman.

A. T. L. asks for a remedy or cure for gapes in chickens. I know of no cure, but can offer what has proved with me'a sure preventive for the last ten years. Put two or three ounces of larkspur seed (sold at devegists') in a four ounce vial and fill nearly full with alcohol. Shake it occasionally for a few days, then as soon as the chicke are ready to come off the nest, let one person hold the chick and another with finger apply the preparation on the comb, rubbing it in a little. Be careful not to get it

THE REPORT OF STREET AND THE PARTY OF THE PARTY AND THE PA

in the eyes, as it is poisonous, and may injure. Gapes are caused by a louse that is always hatched with the chick, and will soon crawl down to the nostril and form the small red worm that has always killed the chicks for me; bence the necessity of applying the remedy in time. From the time stated above I have not lost a turkey or chicken from gapes when I have been prompt with the remedy. When I have had hens steal their nests and hatch out and get away, even in warm weather, the chicks have invariably died

of gapes. Experiments with Oats and Corn. In the latest bulletin from Purdue University Professor Latta sums up the result of experiments made at the college farm with oats and corn. He says:

The results of field experiments depend largely on the conditions involved. For this reason careful mention has been made of soil and season. It should be added that the methods of preparing the ground, and of planting, cultivating and harvesting the crop employed on the college farm, are those of good farmers. The aim has been in every case to secure good average farm conditions. Still it should be remembered that, however well conducted, the field experiments in one section cannot be directly applied to another section having a different soil or plied to another section having a different soil or climate. To illustrate, it does not follow that the best rate of seeding on the college farm will be the best on a very different soil, or under very diverse climatic conditions, or with other methods of farming. The chief value of this bulletin, I think, lies (1) in the hints it gives as to methods of conducting reliable field experi-ments, and (2) in the evidence it affords of the great influence of surrounding conditions on

With the foregoing explanation it will be proper to state the following conclusions as the result of five to eight years of agricultural ex-

perimentation on the college farm:

1. In corn culture the important things are thorough and deep preparation of the ground and keeping the surface clean and mellow, without breaking the corn roots in dry weather. The kind of implement and the method of tillage are of minor consequence provided the abovenamed conditions are secured.

2. Barn manure produces a greater increase in yield, and "lasts" longer than commercial fertilizers. If used fresh it should be applied to 3. Commercial fertilizers have given better

satisfaction upon wheat than upon other crops.
They have not thus far proved profitable on the college farm. I question whether the returns will justify their use on soils of average fertility.

4. The value of a fertilizer depends largely on the crop to which it is applied and on the composition and fertility of soil, and can be determined satisfactorily only by field trial. 5. Broadcast and drill seeding of oats have

given practically the same yields under similar conditions. On broken or foul ground broad-casting would probably be preferred. The rotary broadcast seeder would not, however, secure a uniform distribution of seed in windy weather. The broadcast seeders that have the drill force-feed are less open to the above ob-

6. Thick seeding of oats has given the best yields thus far, but a thick stand makes the 7. The thicker stands of corn have given good yields, but the corn is reduced in size and

the labor of gathering increased thereby. 8. With an equal stand, cultivated one way only, planting corn in twos or threes has given better results than disposing the kernels singly. It seems probable, therefore, that if corn could be planted in hills of two stalks, say three and a half by two and a half feet apart, and in rows each way so as to permit some cross-cultivation, heavy yields of good quality might be pro-

9. Rotation of crops is the most feasible and effective preventive of insect ravages. There have been no serious insect depredations on the College farm since the writer took charge of it

10. A judicious crop rotation equalizes the demands on the land, prevents mixing of crops, increases the yield, provides a variety of feeds for live stock and is thus a means of maintaining the fertility of the soil.

City Business Not Interrupted.

Omaha Man (in Indianapolis)-I am the inventor of a new kind of paving material and would like to see one of the influential members of your City Council. Will you kindly Native-With pleasure, mister. Take that ar there, get off at the penitentiary and ask for

When Beby was sick, we gave her Castoria.

When she was a Child, she cried for Castoria.

When she became Miss, she clung to Castoria,

When she had Children, she gave them Castorie
